totorojs.org

I. What ?

Basic feature

- Run in real browsers
- Support all test frameworks

Simple & Stable

- Concise doc, no config
- JIT feedbacks & report
- Automatic coverage
- Debug

Simple & Stable

- Config error
- Code error
- Browser interrupt

Simple & Stable

- Communication control
- Testing distribution
- Browser guard
- ...

2. How ?

Reference

Karma

Spectacular Test Runner for JavaScript

testling-ci
run your browser tests on every push

LET'S CODE
TDJS

.....

2.1 Socket based

How it works

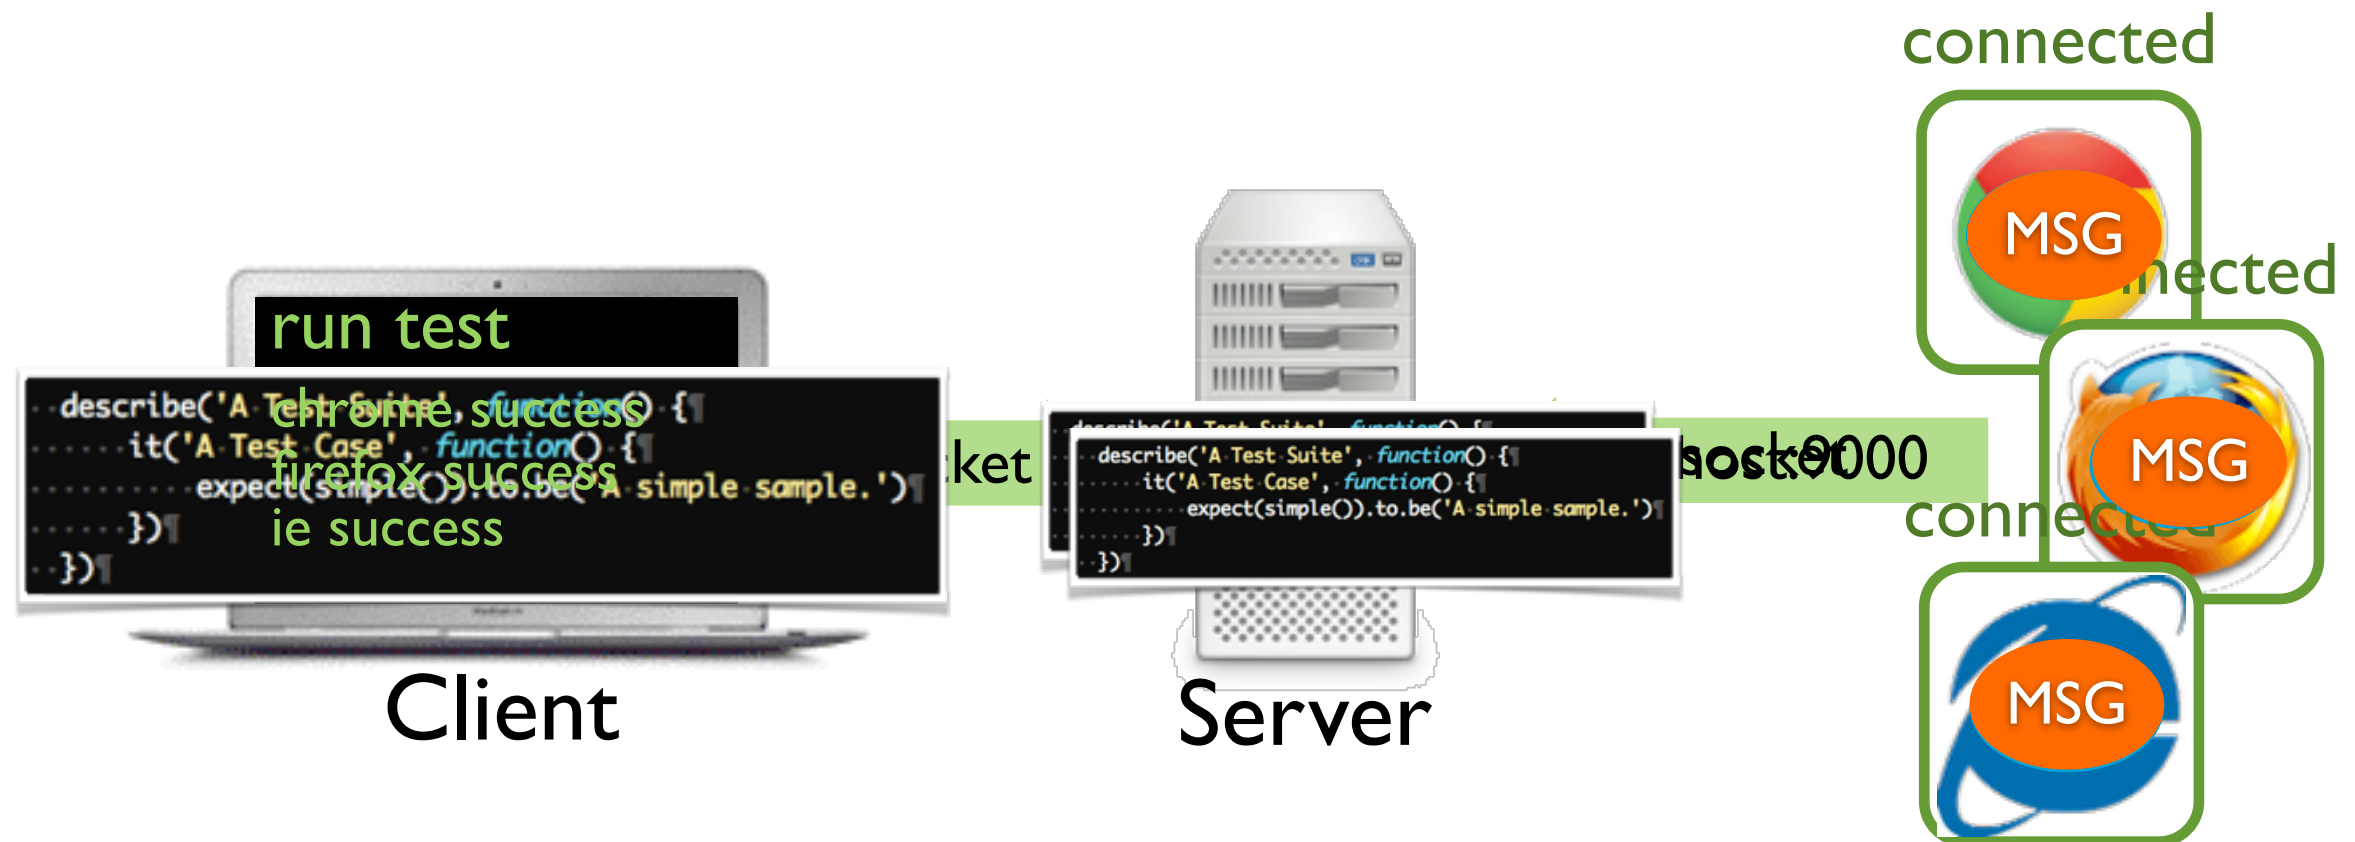

Client

Server

How it works

Problems

- Fragile
 - Browser crash
 - Server crash
 - Exception

2.2 Selenium Grid

How it works

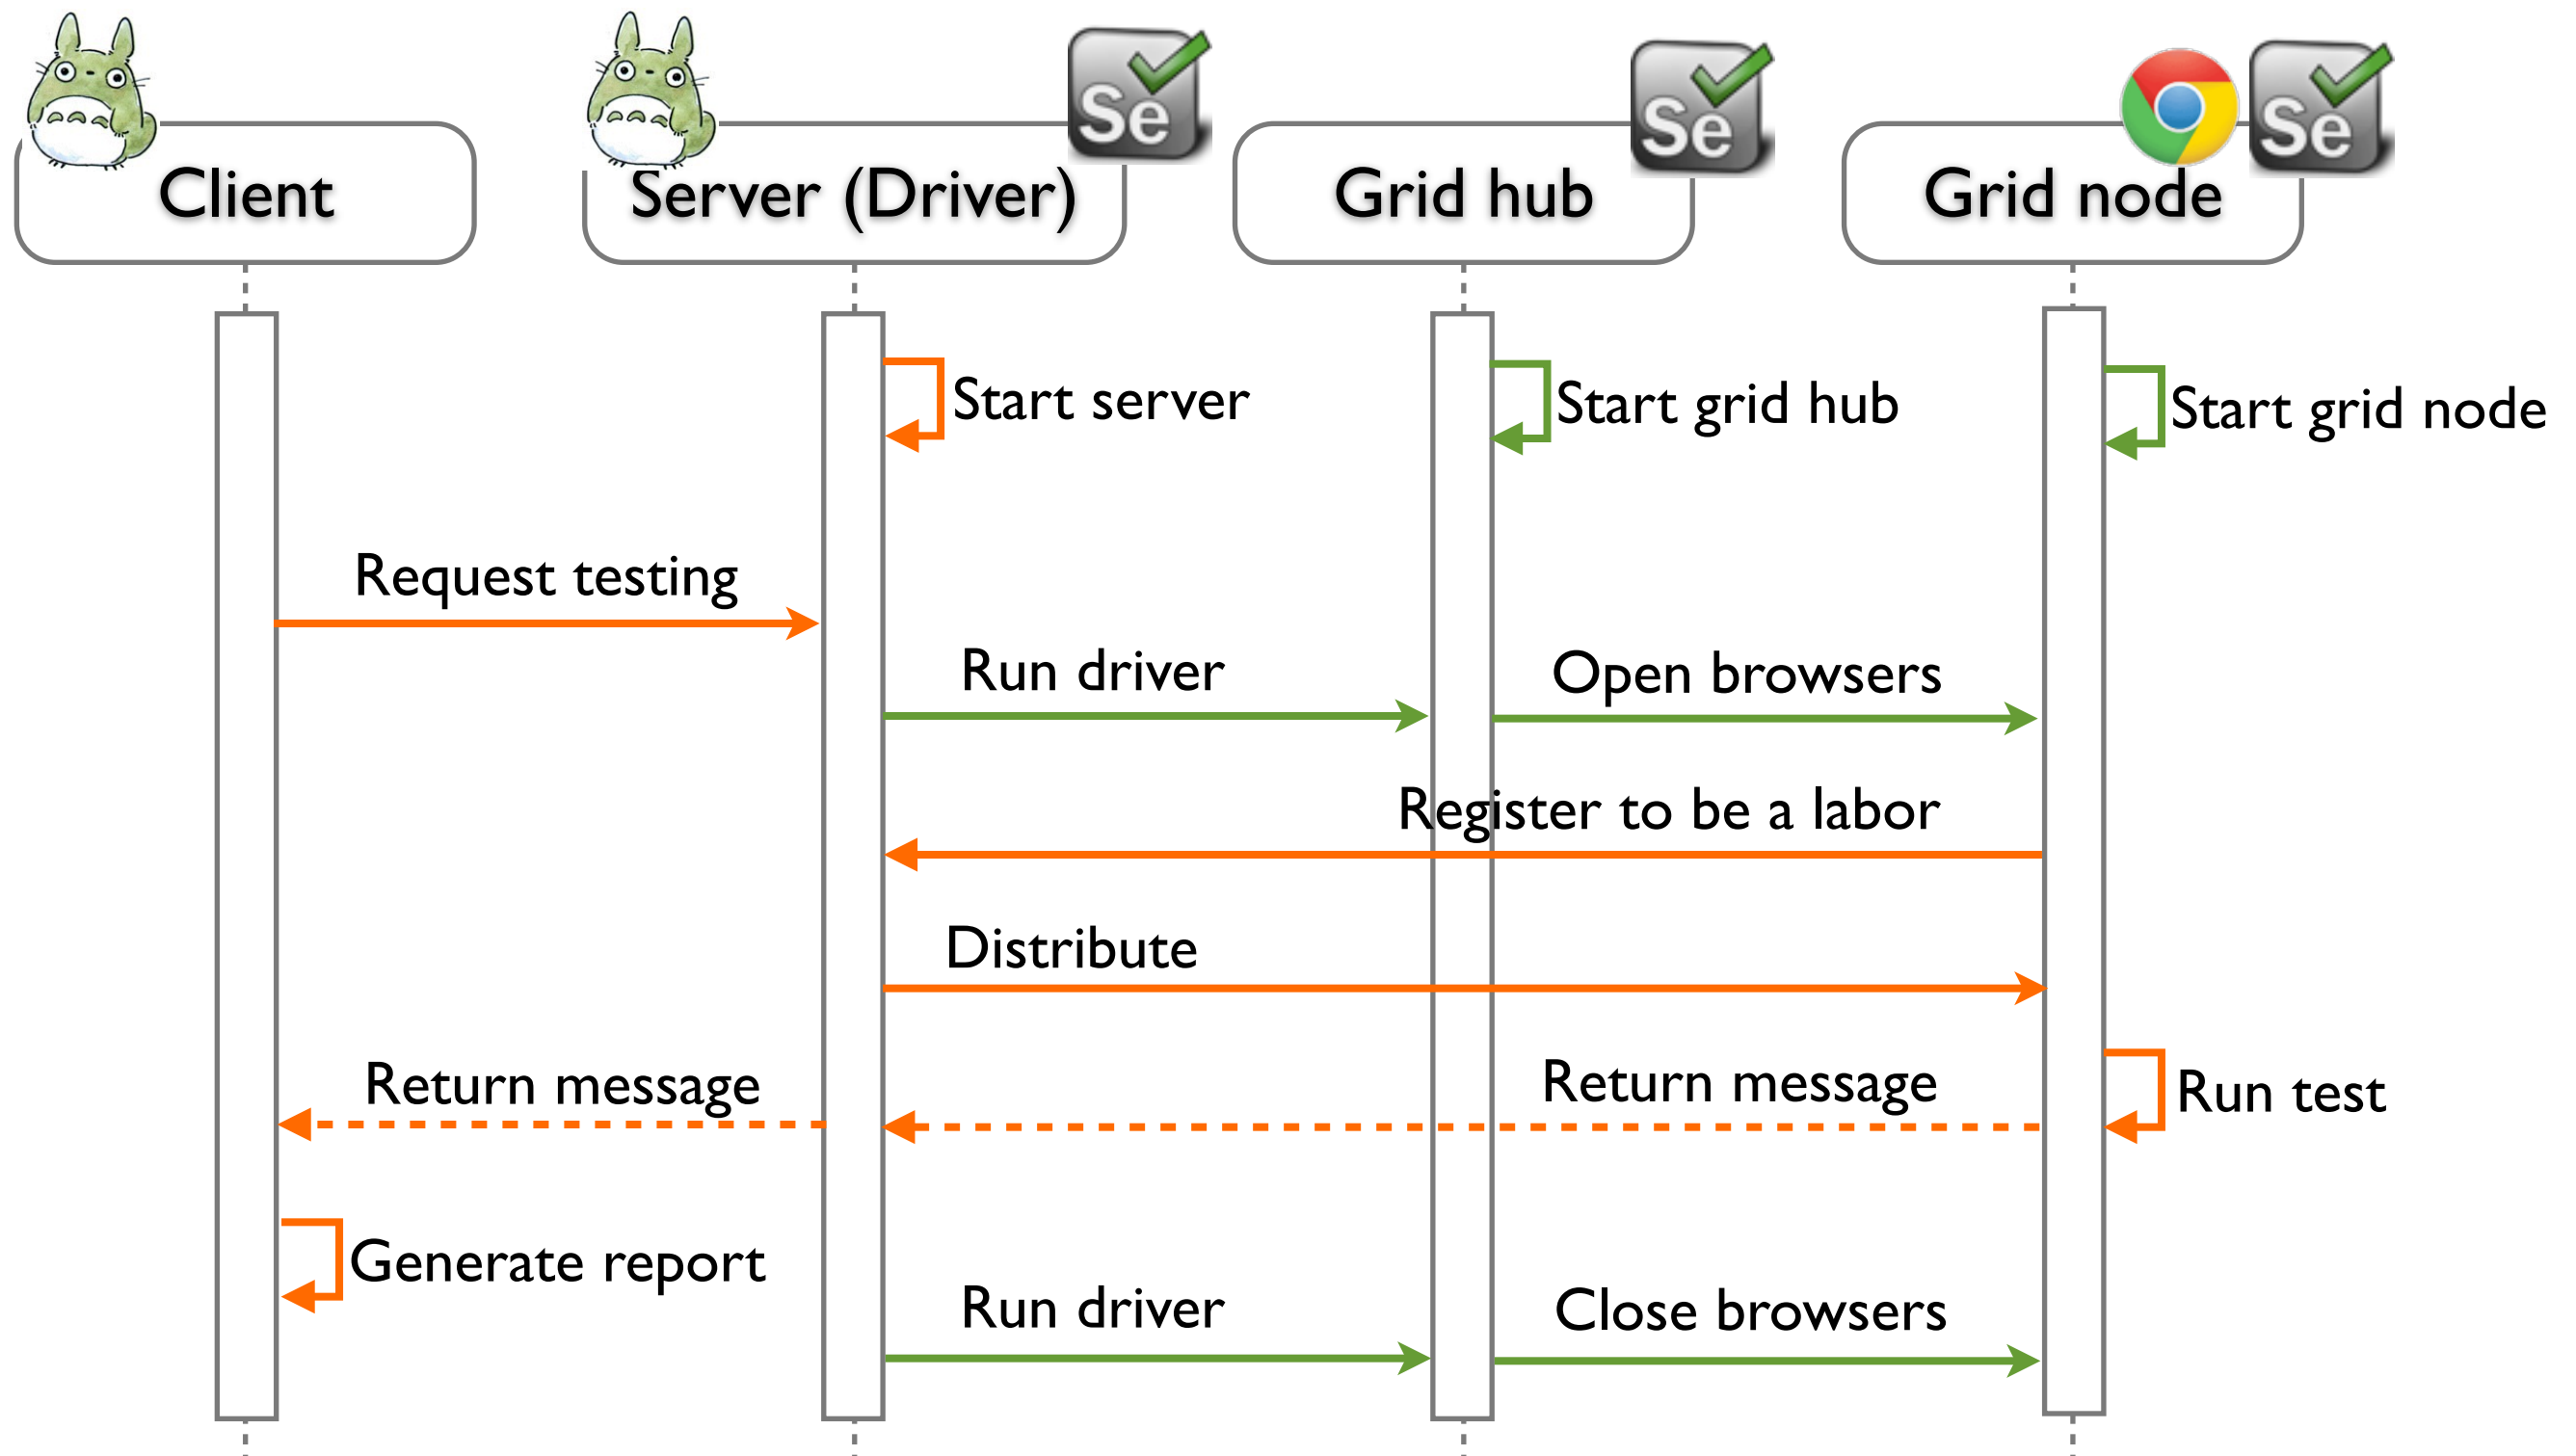

How it works

```
browser = driver.get('chrome')  
browser.open('alipay.com')
```

Socket + Grid

New problems

- Too complex to use
- Strong coupling, a new incentive to crash

Cashed again!

It may be not in the mood.

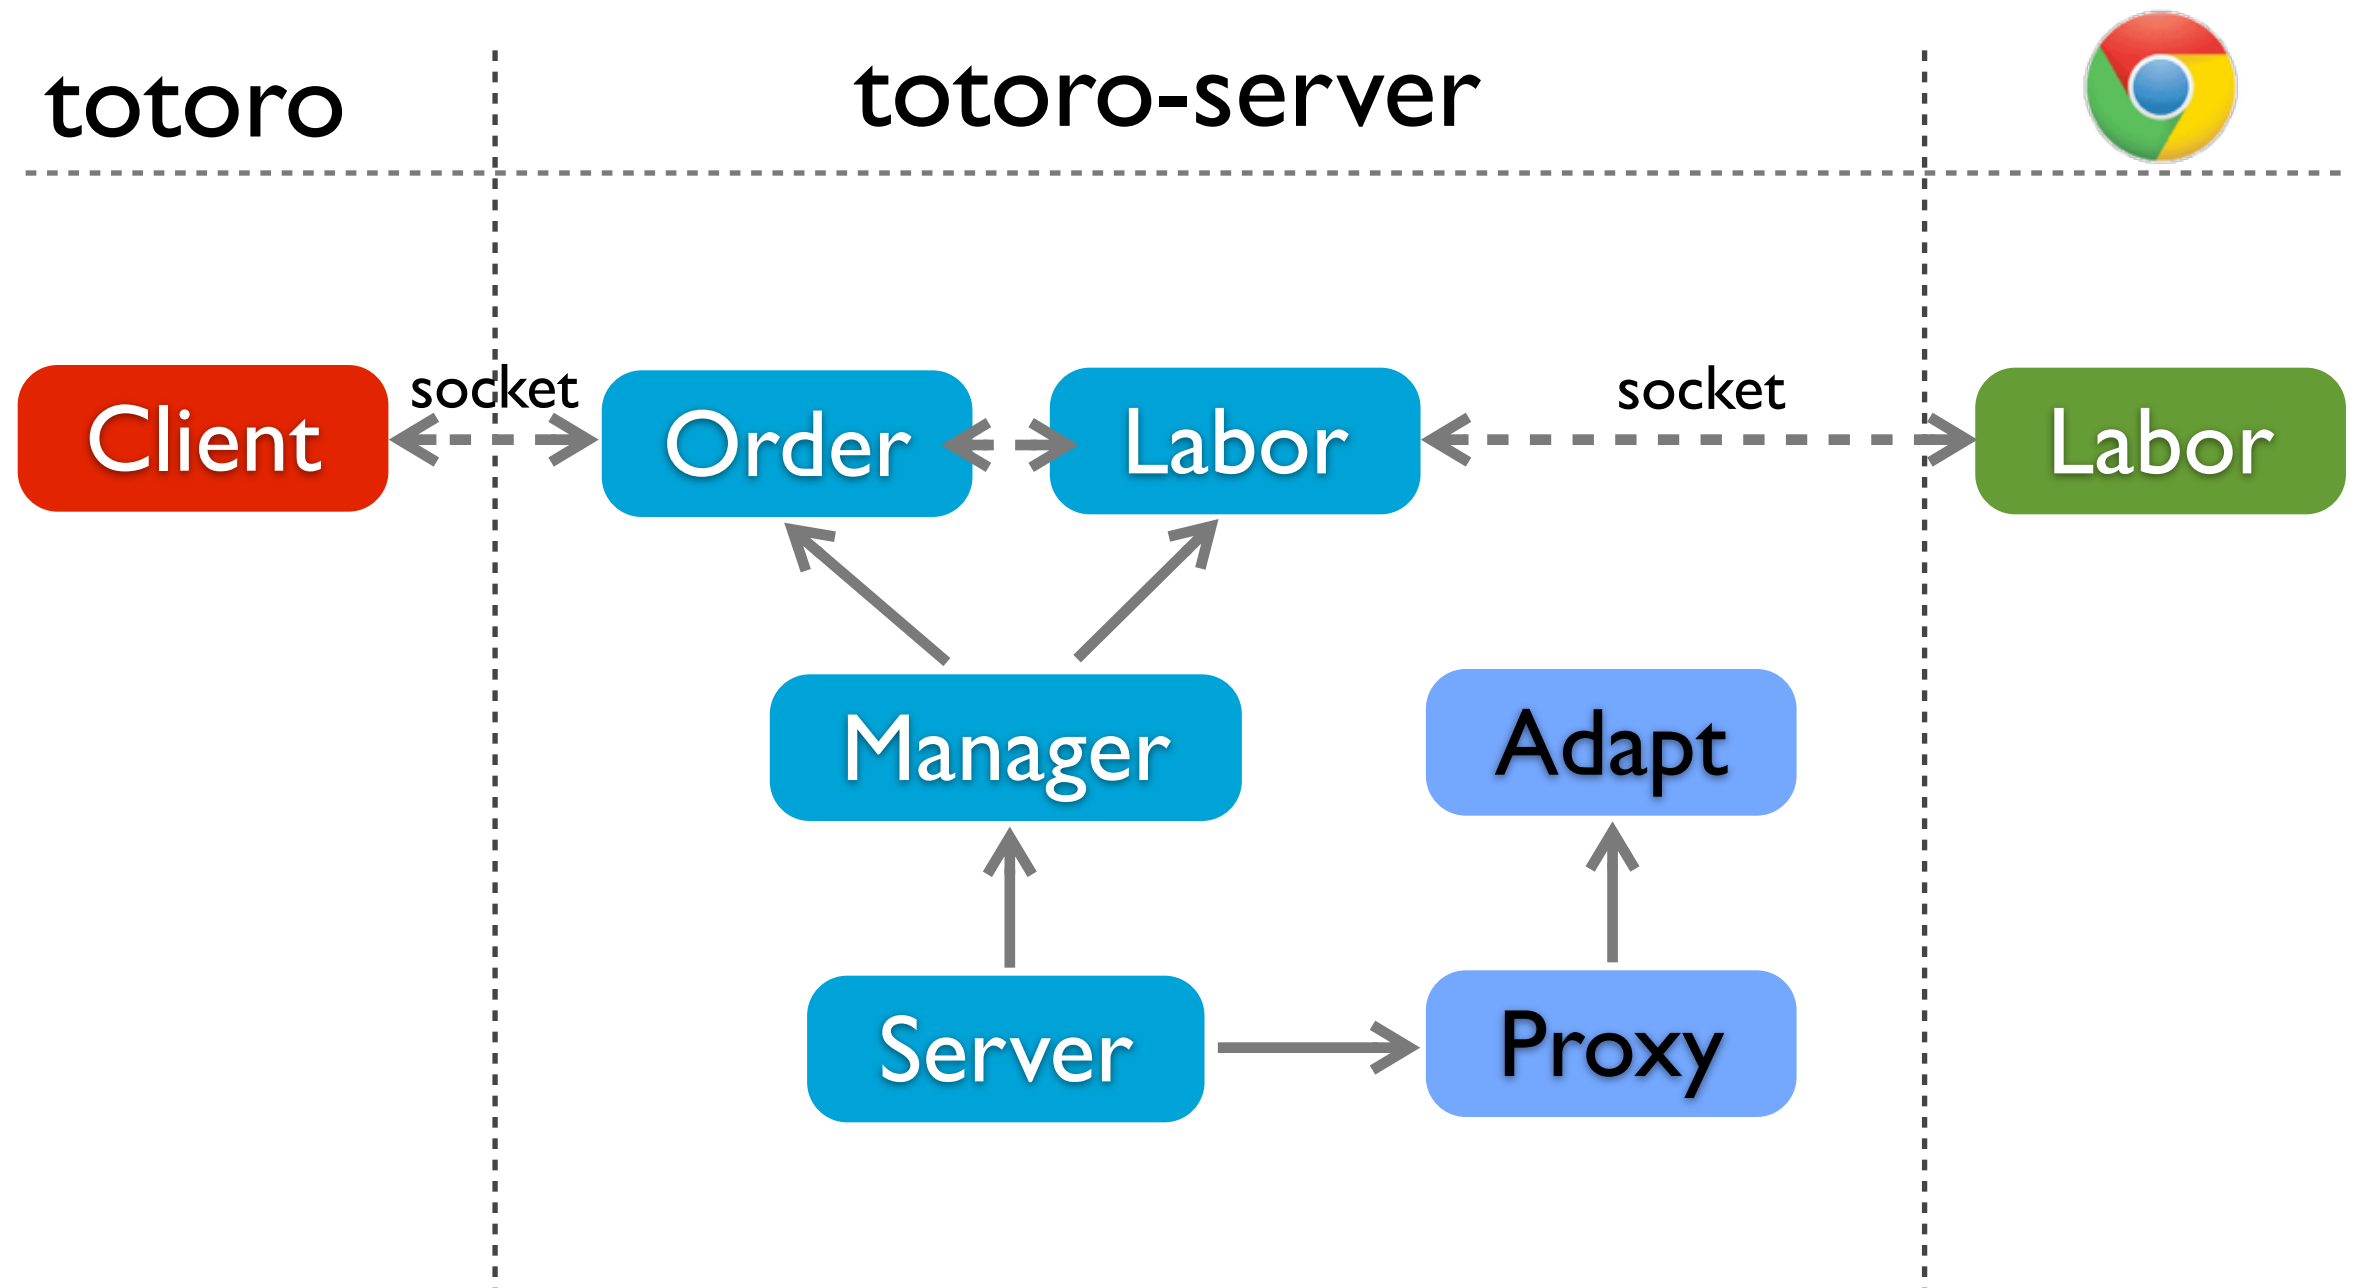

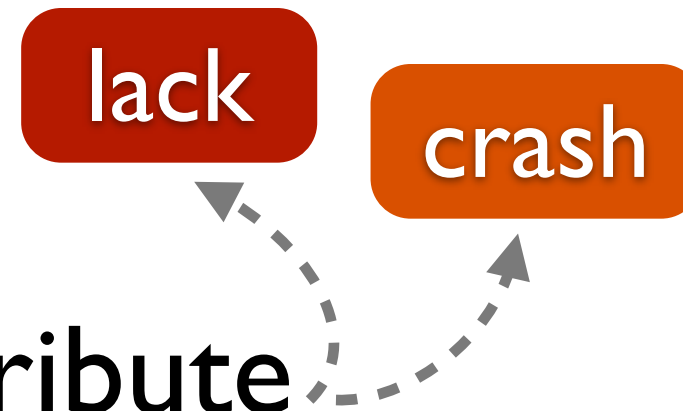

2.3 Totoro

Test tool

How it works

Testing distribution

- When should distribute
- Which browsers should distribute to

When should distribute

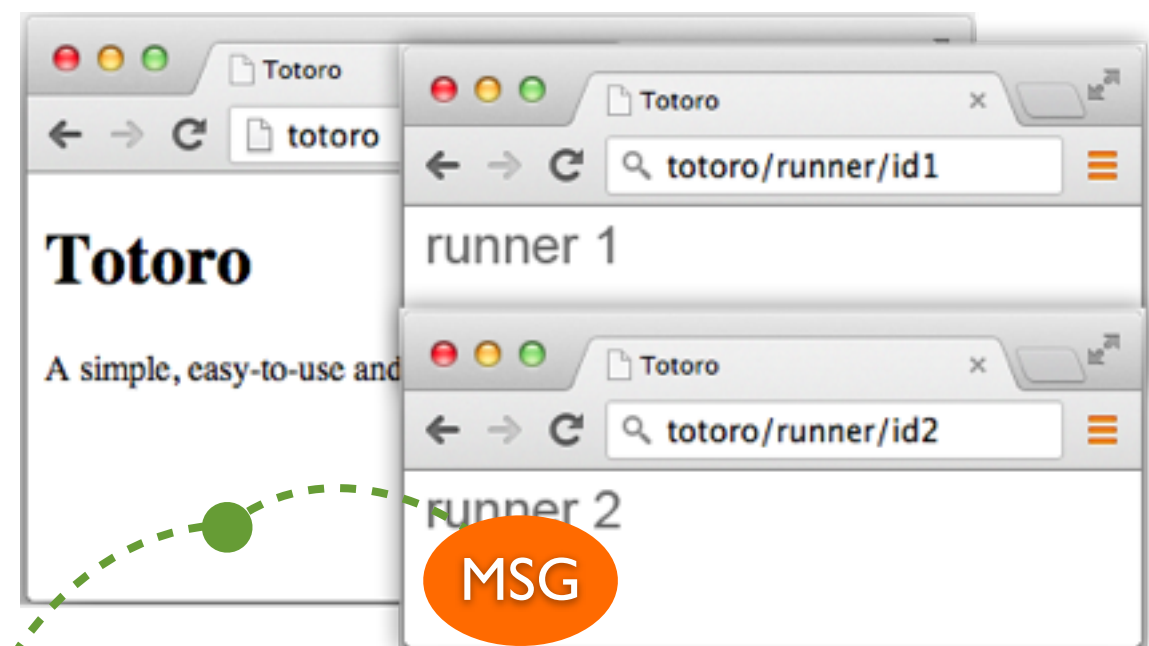

- More orders wait
- More labors available

Iframe or window?

Run in iframe

Run in window

Server

Why not iframe?

- Testing efficiency
- Browser stability
- Correctness of testing result

Why not iframe?

```
it('width is not zero', function(){  
  var el = document.createElement('div')  
  document.body.appendChild(el)  
  expect(el.offsetWidth).not.toBe(0)  
})
```

ie 6.0 / windows xp
Failed 1 of 1 tests in 16ms
width is not zero: expect 0 to not equal 0

chrome 30.0.1599.69 / macosx 10.8.4
Failed 1 of 1 tests in 6ms
width is not zero: expect 0 to not equal 0

2.4 Browsers

Browser guard

Basic feature

- Start browser
- Kill browser
- Visit URL

Advanced feature

- Monitor status
 - Memory
 - CPU
 - Running
- Monitor connection

How it works?

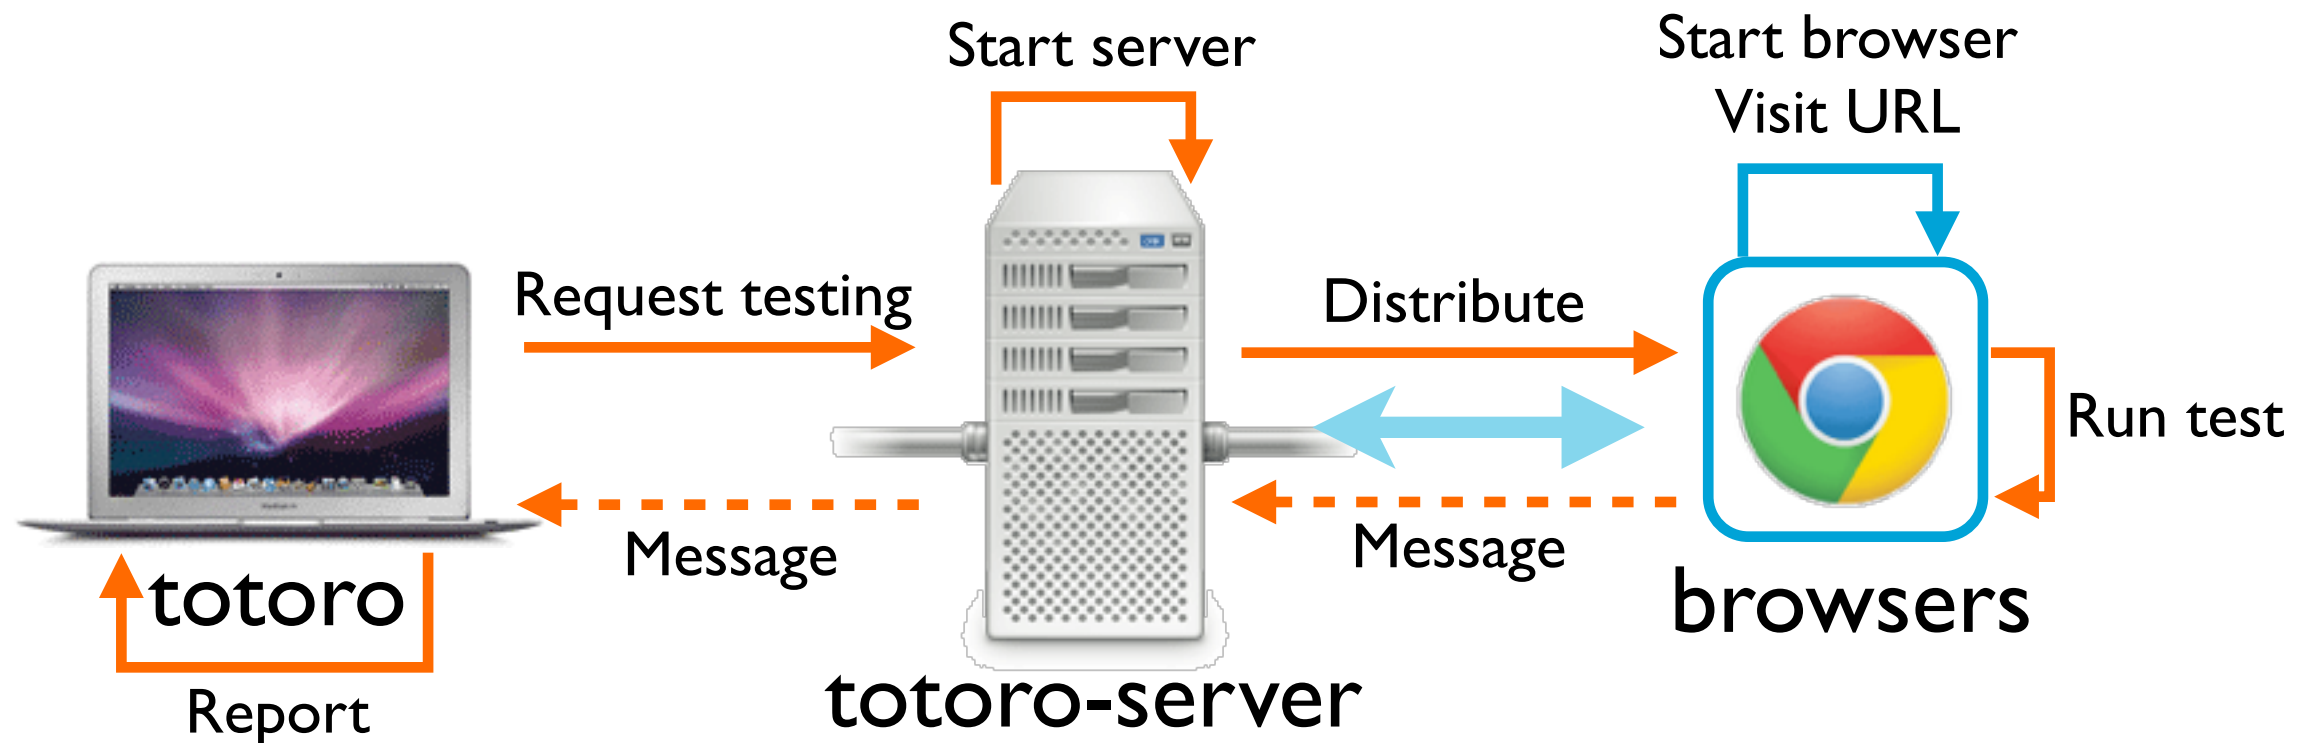

/Applications/Firefox.app/Contents/
MacOS/firefox-bin **URL**

https://developer.mozilla.org/en-US/docs/Mozilla/Command_Line_Options

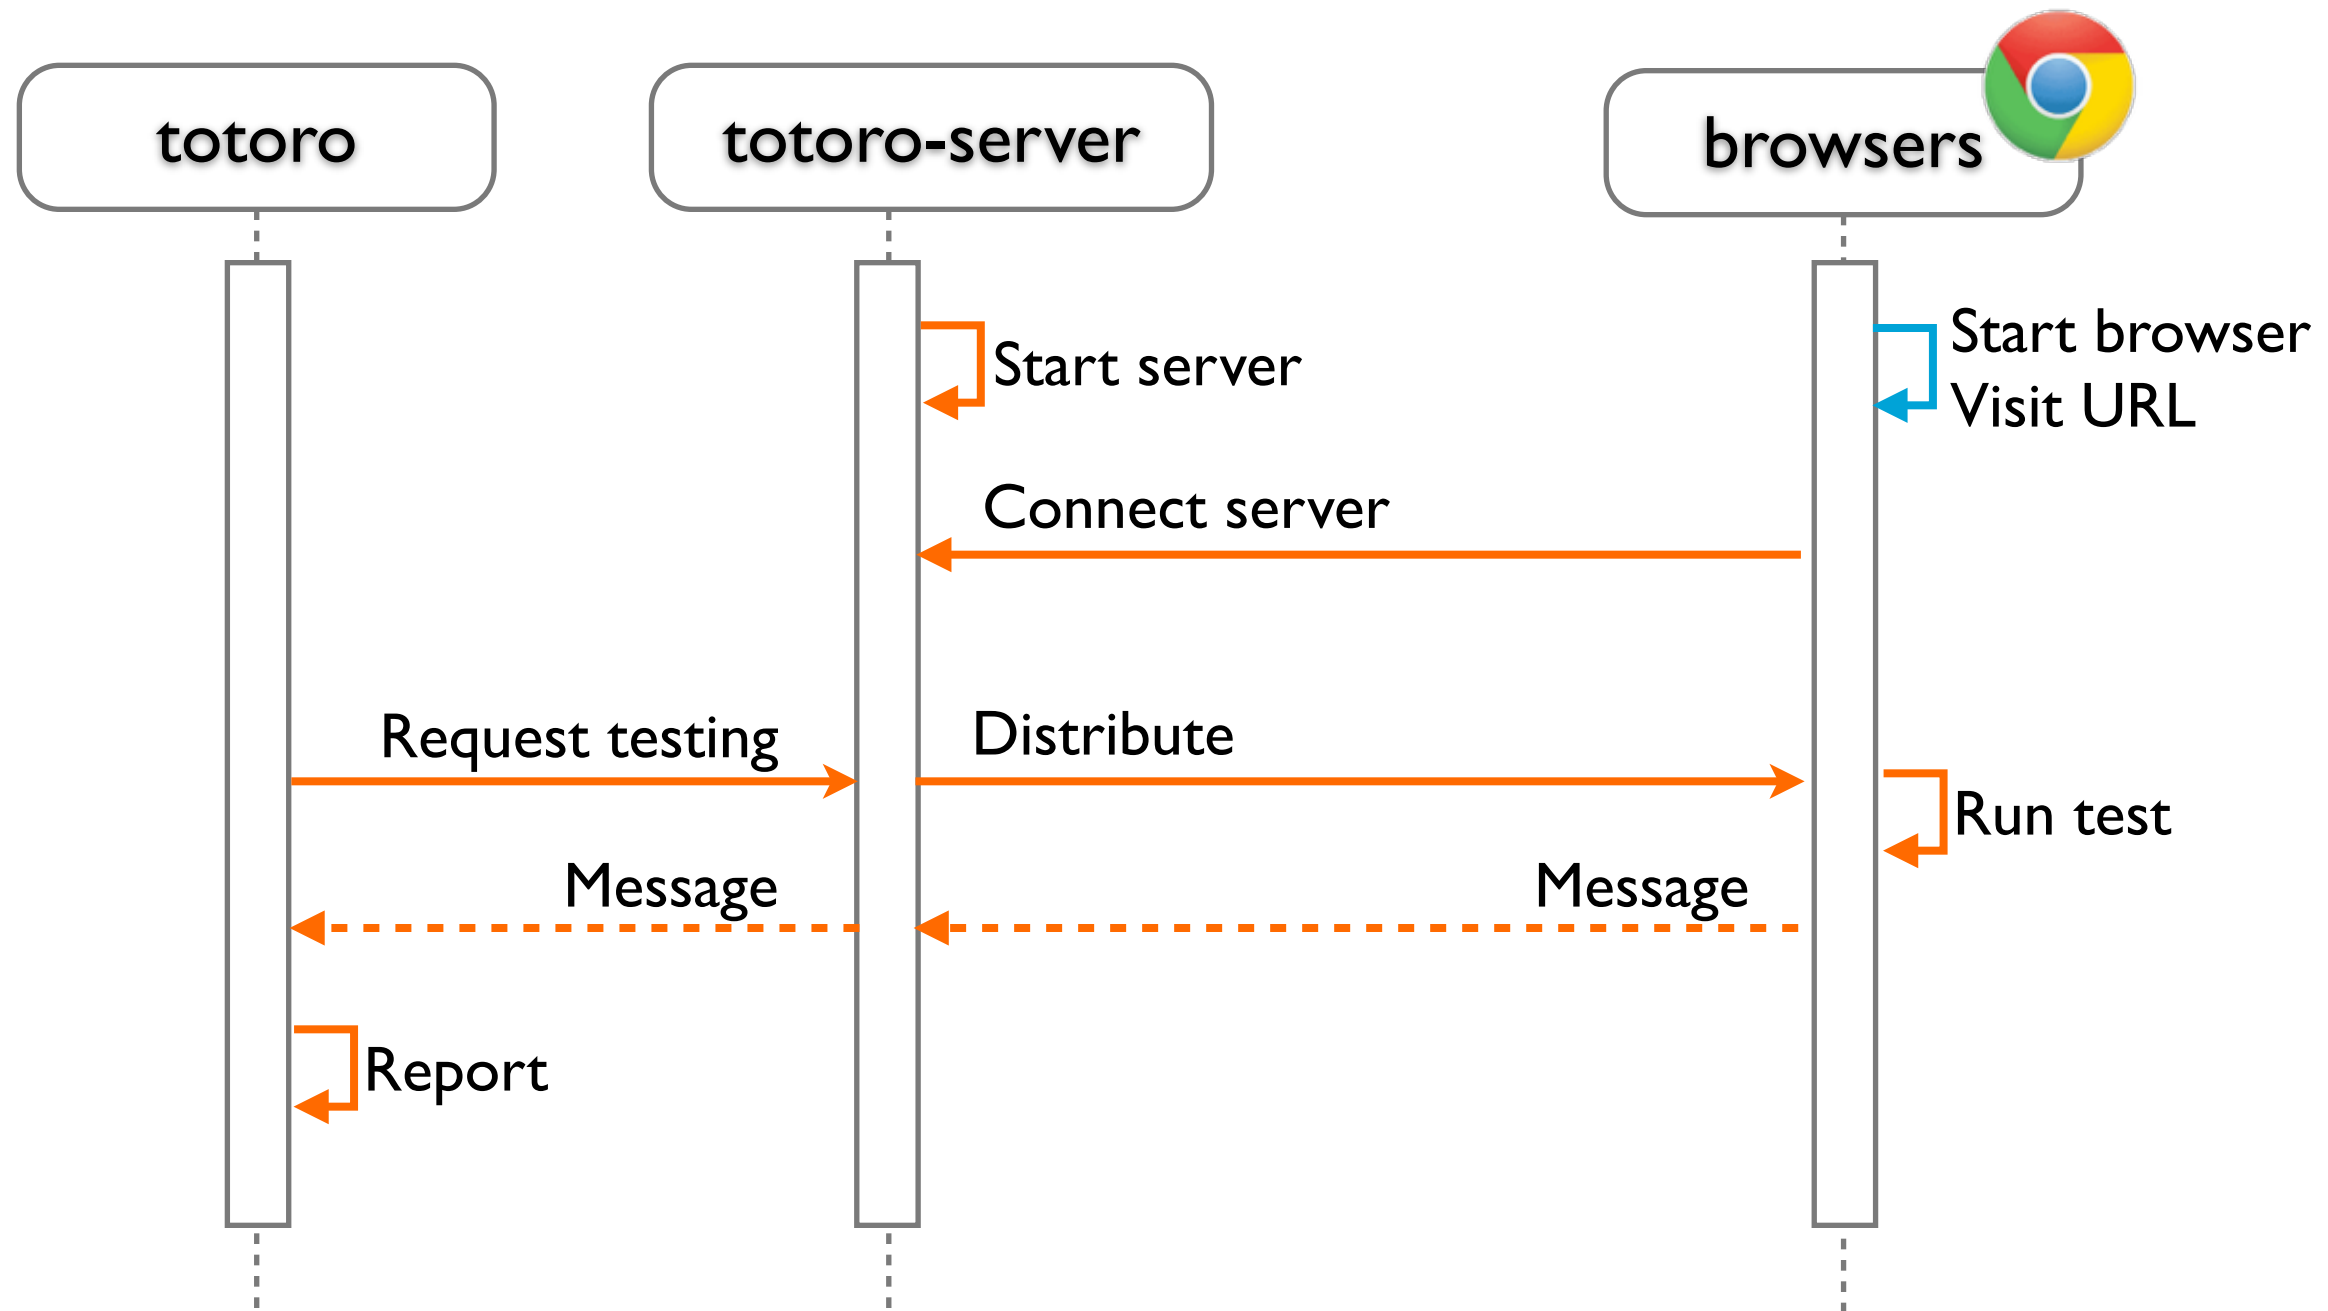

Totoro + Browsers

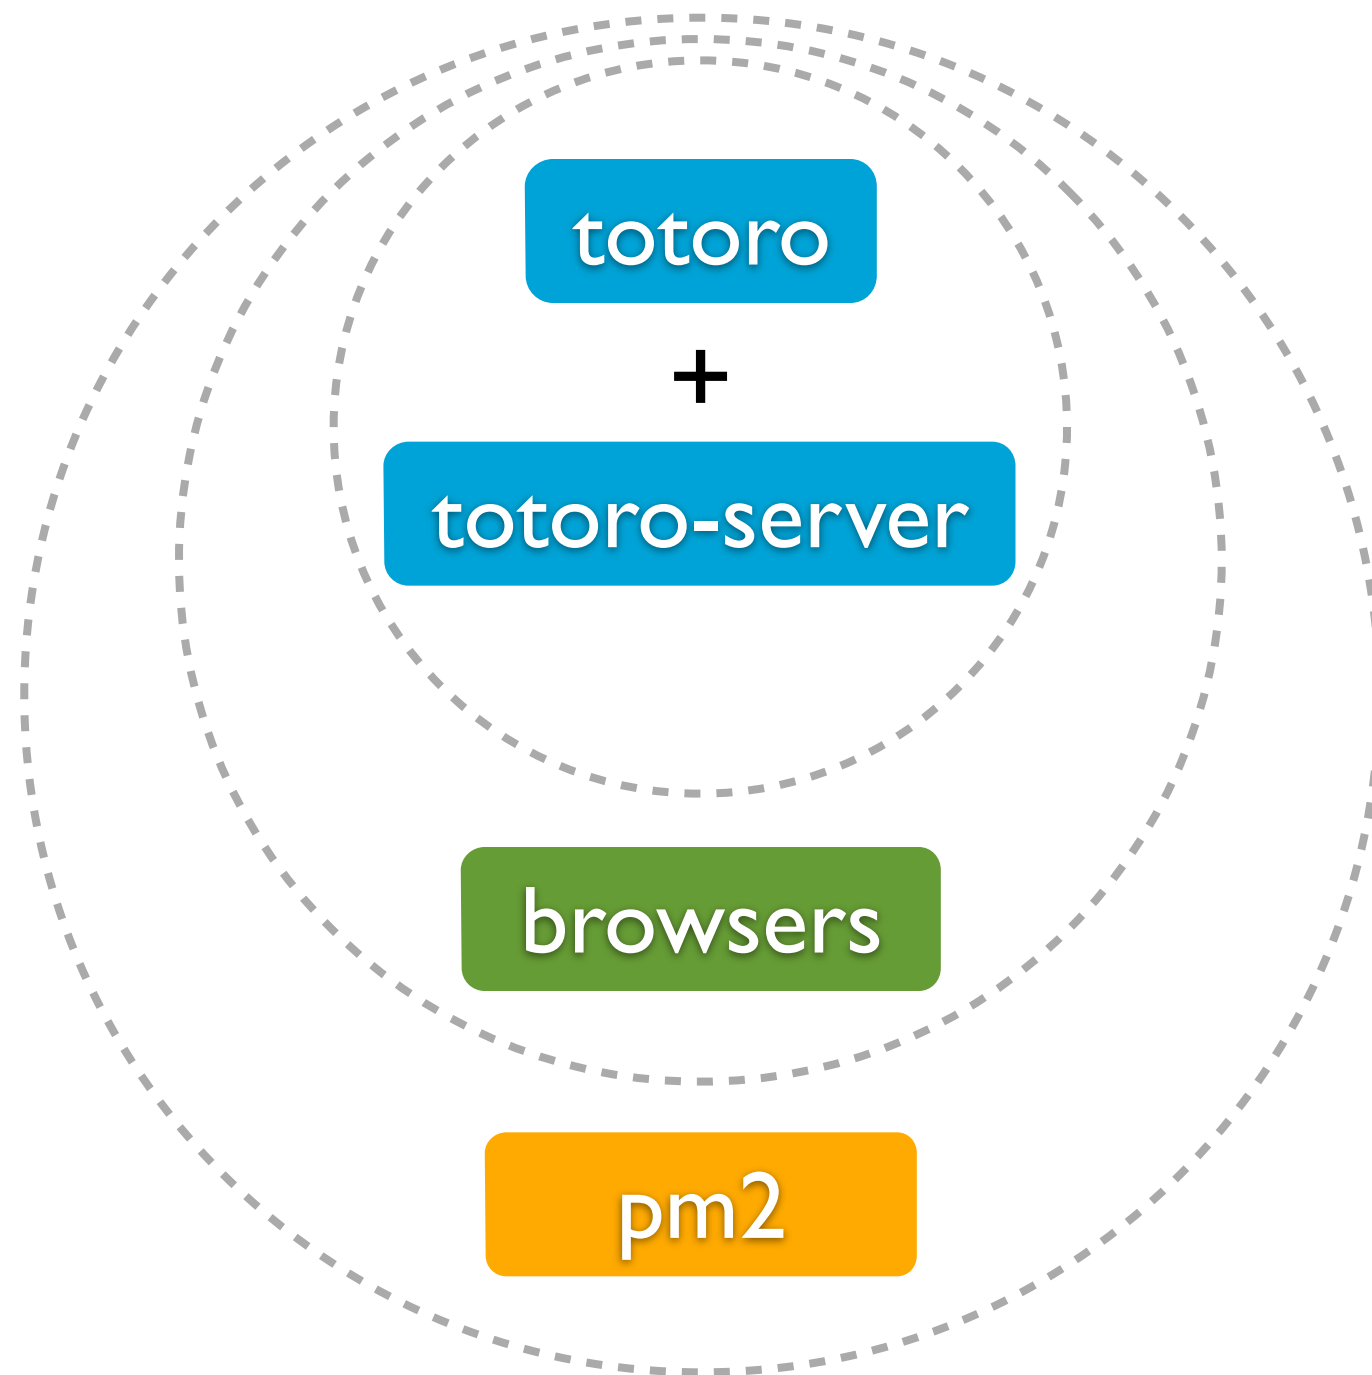

Totoro + Browsers

Totoro + Browsers

tla

tci

Learned

- Clear responsibility
- Keep simple
- Eye for details

3. Then ?

- More stable
- Continuous integration
- Open service

totorojs.org

Thank you!

Q&A
